BLUE APRIL

WHAT IS BLUE APRIL

Families First created the "Blue April" project as a collaborative effort to recognize National Child Abuse Prevention Month. The goal is to remind the entire community of the role we all play in creating safe, and healthy futures for our community's children. Participants donate \$5 or more in support of Families First programs that have been preventing child abuse in thousands of families for 33 years.

WHY SHOULD MY COMPANY GET INVOLVED?

Child abuse prevention requires community partnerships and this project provides a unique, fun, and inexpensive way to do just that. It also creates an environment of purpose and teamwork within your school, business, sorority, fraternity and Church. Individuals and families can participate, too.

HOW CAN MY COMPANY JOIN?

Complete the form below and click submit. Also, you can print and email the form to cpatterson@familiesfirstpbc.org or mail it using the address provided below.

Appoint a team captain to collect donations and distribute the information Families First will provide about "Blue April." Families First will publicize the participating companies on our website and social media. When employees donate \$5 or more, they receive a bracelet for their support.

Additionally, we encourage all participants to fundraise for the entire month of April and then wear blue on Friday, April 26th, to show a unified community effort to build awareness for this cause. Please share your pictures and tag us in social media. #familiesfirstpbc, #ffpbc #blueapril2024 #stopchildabuse

WHAT IS FAMILIES FIRST OF PALM BEACH COUNTY?

Families First has successfully been preventing child abuse for 35 years by providing needed services to families whose life circumstances leave them ill-equipped to provide safe and loving homes for their children.

By providing services in the areas of child abuse prevention, housing, health and behavioral health, families become stable and self-sufficient. For every child protected from abuse, the community saves \$105,000 in future costs of hospitalization, special education, juvenile justice and school failure – all aftermaths of abuse.
